Figure 1 illustrates a power distribution system. A 4800kVA transformer is connected to a busbar. The system is divided into two main sections: T02-INV05-S10 and T02-INV06-S01. The T02-INV06-S01 section further branches into T02-INV06-S02 through T02-INV06-S11, and T02-INV11-S01 through T02-INV11-S21. The diagram shows the interconnections between these components, including a ground connection on the left.

4. 本分区内 12 个分区的组编号如下：分区分号 = 分区分号 + 串码编号 + 表示。
4. The string number in the TO2-Inverter SO1-means : Zone number+Inverter number-string number.
5. 本分区共设逆变器 12 个，逆变器编号与所在分区分号 = 分区分号-1。
5. There are 12 inverters in the zone TO2, and the inverter number corresponds to the partition number and sub-partition number.
6. 一般将并网逆变器阵列与逆变器的位置匹配选择阵列串，尽可能优化并串串联电压长度。
6. Array wiring should be reasonably selected according to the position of the array and the inverter, and the length of the series cable of the components should be optimized as much as possible.
7. 将用 X6 电缆头考虑与光伏池件文字说明。组件电缆规格、支架、逆变器或在地面以下敷设时，管口密封，电缆头规格。

1. The photovoltaic module power connected to the No. 12
